

Organise your own Rifugio Tournament !

WHAT TO DO?

The title says it all.. organize your OWN tournament.. In other words: You decide how you wanna play. To help you get started **three** different formats are described below..

EASY

All you need is one Rifugio basic game: The New Edition (that's the one including material for a fifth player and the Rivers&Rafts extension set) and of course 2, 3, 4 or 5 players. The first round you play the basic game, the second round the Rivers&Rafts extension set. The one winning both rounds, will win the tournament. If two players won a round, they play a final.

Note: If you've got more the one basic game, you can play with more then 5 players. E.g. two tables with 3 players each. You can let a draw decide who gets to sit at which table.

Draw example:

If you have eight participants take e.g. four green and four red Rifugios, put them in a box and let people (with their eyes closed) take turns picking a rifugio out of the box. The ones with the same color rifugio will sit at the same table.

CLASSIC

This is like the EASY option, but then with a Helicopter-round added. For this the Helicopter extension set is needed. (We call this classic, because the first 24 tournaments organized by NRPGames all had this structure.) Here also the one winning most rounds wins the tournament and if three players all won one round, they play a final.

Note: If you've got more the one basic game and helicopter set, you can play with more than 5 players and let a draw decide who gets to sit at which table.

1 VS 1

This is the structure used at the Dutch National Championship and all tournaments organized by NRPGames since may 2018. Here we only play 1 against 1. You'll understand that for this structure you'll quickly need a lot more time or games.

Everyone plays two **qualifying games**. Where players get 1 point for each game won, ½ a point for a tie, or a game not played (when there's an uneven number of players) and 0 points for a game lost. This decides who the best players are. If there is a tie, we look at the "goal score". (This is the points a player scored in all games minus the points his/her opponents scored in those games.)

Depending on the number of participants the best 2, 4, or 8 players play the **finals**. Here only the winners continue. Again, if there's a tie, the goal score of both players (up till that moment) decides the winner.

Organise your own Rifugio Tournament !

Score form

flowers					
animals					
waterfalls					
passes					
mountaintops					
subtotal					
rifugio's					
rafts					
helicopters					
bears					
total					

In the upper left corner you can fill in the number of the round. Next to it the names of the players. And their score below.

Hourglass:

Use a timer/hourglass if you like. Give each player e.g. 60 sec. per turn. Decide up front how tough you wanna be. If, because of this, a tile is not placed it remains unused at the end of the game.

Fair Play

Play fair always! Don't visit an opponent's Rifugio just to help him/her to victory, or get a higher goal score.

PRICE FOR THE WINNER:

Hopefully each format will already give you lots of fun playing. But why not also get a price for the winner? For 9,95 Euro only (ex. Shipping), you can order the Tournament-Kit!

This is a unique purple colour playset for the winner! Containing all you need to play the basic game, Rivers&Rafts or Helicopter with the color purple. Furthermore you'll get a Rifugio Hi-King Card with a purple sticker, with which you can mark the skill you've won the tournament with.

If later you'll join an official tournament organized by NRPGames and win, you'll also get a number to write on the front side of the card and be listed in the Rifugio Hall of Fame!!

To order the Tounament-Kit go to ORDER in the menu of www.nrpgames.com
